

DR 2500 Flat Panel Digital Navigator System

Top 10 reasons to buy a DR Flat Panel System

- Immediate image acquisition
- Automatic dose compensation
- Lightweight
- State of the art technology
- Easy to use
- Full system package available
- Durable composite casing
- Compact and portable design
- Highest level of detail available

Complete Digital Imaging System

CUSTOM SOLUTIONS TO MEET THE NEEDS OF ANY PRACTICE

Our new 8x10" DR 2500 Digital Navigator System provides accuracy, flexibility, ease of operation, help you tame even the most demanding shots. Our custom engineered systems, high-quality x-ray generators and DR smart flat panel detectors can produce lightning fast, high-resolution, DICOM images at a fraction of the cost of other digital systems.

DR 2500 Flat Panel Digital Navigator System

X-Rays are an Integral and repetitive part of your day.
They require a substantial investment in your time and money, in supplies and maintenance. Finally technology has delivered the ideal solution and it's mobile!

The DR Navigator 8x10"
Smart Panel 2500 is a
Complete Digital Radiographic
Imaging system. Produces quality
radiographic images of Small and Large patients.

One of the smallest sized - highest detail - self-contained
digital imaging systems. The DR Navigator 2500 differs from
traditional X-ray systems in that, instead of exposing a film and
chemically processing it to create a hard copy image, a device called a Detector
is used to capture the image in electronic form. The DR Navigator 2500 system is a
Flat-panel Digital X-ray detector with a revolutionary technology that captures radiographic
images in digital format within seconds, eliminating the need for an X-ray film, phosphorescent plates
or cassettes.
