

DR 4300 Flat Panel Digital Navigator System

Finally
technology has
delivered the
ideal solution!

Top 10 reasons to buy a DR Flat Panel System

- Immediate image acquisition
- Automatic dose compensation
- Lightweight
- State of the art technology
- Easy to use
- Full system package available
- Durable composite casing
- Compact and portable design
- Highest level of detail available

Complete Digital Imaging System

CUSTOM SOLUTIONS TO MEET THE NEEDS OF ANY PRACTICE

Our new 17x17" DR 3500 Digital Navigator System provides accuracy, flexibility, ease of operation to help you tame even the most demanding shots. Our custom engineered systems, high quality x-ray generators and DR smart flat panel detectors can produce lightning fast, high-resolution, DICOM images at a fraction of the cost of other digital systems.

DR 4300 Flat Panel Digital Navigator System

X-Rays are an Integral and repetitive part of your day.
They require a substantial investment in your time and money, in supplies
and maintenance. Finally technology has delivered the ideal
solution and it's mobile.

The DR Navigator
17x17" Smart Panel
4300 is a Complete Digital
Radiographic Imaging system. Produces
quality radiographic images of Small and Large
patients. One of the smallest sized - highest detail -
self-contained digital imaging systems. DR Navigator 4300
differs from traditional X-ray systems in that, instead of exposing a film
and chemically processing it to create a hard copy image, a device called a
Detector is used to capture the image in electronic form. The DR Navigator 4300
system is a Flat-panel Digital X-ray detector with a revolutionary technology that captures
radiographic images in digital format within seconds, eliminating the need for an X-ray film,
phosphorescent plates or cassettes.
