DR 3500

Digital Navigator System

X-Rays are an Integral and repetitive part of your day.

They require a substantial investment in your time and money, in supplies and maintenance. Finally technology has delivered the ideal solution and it's mobile.

DR Navigator Smart Panel 3500 Advanced Featured Digital Imaging System

The DR Navigator Smart Panel 3500 is a Complete Digital Radiographic Imaging system. Produces quality radiographic images of Small and Large patients. One of the smallest sized - highest detail - self-contained digital imaging systems. DR Navigator 3500 differs from traditional X-ray systems in that, instead of exposing a film and chemically processing it to create a hard copy image, a device called a Detector is used to capture the image in electronic form. The DR Navigator 3500 system is a Flat-panel Digital X-ray detector with a revolutionary technology that captures radiographic images in digital format within seconds, eliminating the need for an X-ray film, phosphorescent plates or cassettes.

With twenty-eight years of chiropractic radiology experience Diagnostic Imaging Systems is known for taking care of your imaging needs!
